

Interview Experience

Subham Yadav (M.Sc. 2022-24)

Total Rounds -3

Round 1- Online Assessment (75 questions in 90 mins).

The questions were from Verbal Ability, Quantitative Aptitude, Logical Reasoning and CS Fundamentals consisting of some incomplete codes in C & C++ and some shortcuts of MS Excel and MS Word.

Round 2- Technical Interview (35-40 mins)

The Interviewer started with his brief introduction and asked me to introduce myself. As in my case I have updated my Resume so I asked him to consider my updated Resume which I was carrying. He took 2-3 mins to read my new resume and continued my interview with the new one. He asked me to give an overview of my projects and then he asked me to explain any one of them. After that he asked questions from the coding part and since it was a ML project, he asked questions about different models, libraries and particularly SMOTE. Then he asked about the course curriculum of masters. After that there were theoretical question from SQL. Then he asked to write 7-8 queries which includes joins, complex nested queries (2-3questions) and DCL. As I mentioned puzzle solving in my hobbies, he asked me a puzzle [\[Puzzle\]](#) . At the end he asked me some questions from resume, apart from academics (like co-curricular activities, in my case specifically sports). At the end he asked me if I wanted to ask anything.

Round 3- HR Interview (15-20 mins)

The interviewer introduced herself and asked me to introduce myself. Then she asked me about some achievements that are not mentioned in resume. Then she asked a simple puzzle (since I mentioned it as one of my hobbies). She asked some general questions like what makes Axtia different from other companies, what job location do you prefer and where do you see yourself in next 3 years. She asked about my strengths and weaknesses. In the end, she asked if I had any final questions.

Suggestions:

- For Online Assessment, you should practice solving puzzles, sitting arrangement problems and different types of aptitude problems asked in banking exams.
- For Round 2, be honest with your Resume and you should have a thorough knowledge of your projects and skills that you have mentioned.
- For Round 3, be confident and do not try to outsmart the interviewer.
- Try to keep calm and original.

ALL THE BEST FOR THE FUTURE.
