

Interview experience

Company name: Intellicus

Name: Ramneek

The process consisted of probably 3-4 rounds depending on the time availability.

The process started with **Round 1** which consists of questions covering all the subjects of computer science, questions from quant and reasoning were also present.

The shortlisted students were promoted to Round 2

Round 2: It was a Technical interview round where questions related to the projects undertaken were asked, including the questions from Algo, DS, Software eng., DBMS, 2-3 coding problems (medium level) were asked.

A bunch of theory questions were also asked from C++, Java

The shortlisted students were then promoted to Round 3, which was conducted with one of the senior members who was quite experienced and so did he ask questions accordingly.

Round 3: A brief discussion about the prevailing technologies, the projects undertaken and how well versed a person is with his/her skill sets, what are the communication skills a person possesses, this round was a judgement of all the areas.

Based on the result the selected candidates were called for a Hr round

Round 4: Basic questions on your education details, introduction nothing much

And then after the results were announced.

In all the process was quite hectic, since the team came from Indore, and it lasted almost a whole day..but be patient enough to answer to the best you know and don't try too hard if you don't know anything about the question being asked..

All the Best
