UserFacet Interview Experience for frontend developer profile

Bhavna Nagar, MCA

Round 1:Project

We were asked to develop a project based on profile we applied for .In project we were asked to implement following:

1. To create : A dynamic page to display population data along with filtering feature on the basis of year. List the data on webpage.
2. A search box, where users should be able to search data on the basis of state and on page refresh need to retain the data along with an url updated for different applied year in the filter.

   Example - https://datausa.io/api/data?drilldowns=State&measures=Population&year=2019

   Note: There may be years for which no data is available as well.

3. A filter to display all the data on the basis of the year selected.

Round 2: Technical Interview

Platform: google meet

1. Interviewer introduced himself and then asked me to introduce myself.
2. Difference between Html5 and Html.
3. Difference between display=none , opacity=0, visibility=none.
4. Asked me to rate myself on scale from 1 to 5 in Html ,CSS ,javascript and React.
5. Difference between var, const and let.
6. Difference between state and props.
7. A long discussion on my projects.
8. Question asked if given that expire time of token is 15 minute .how to update token without logging out user (Concept of access token and refresh token in jwt).
