INTERVIEW EXPERIENCE - AXTRIA
ANAND SHARMA - MCA

Round 1 :: Online Assessment (90 minutes)
- no of questions : 75
- there are 4-5 sections including quant & reasoning, verbal, data interpretation, programming : mostly input output, fill the codes, and some application questions based on excel etc.
- no of shortlisted students: 21

note: try to do sure shot question first. attempt all . the only difficult part would be DI , at least give that a read , you'd be able to solve few of them.

Round 2 :: technical (40 minutes)
- started with introduction (he was from electrical background having 10+ years of industry experience.)
- he asked me to tell about the best project I have worked on. (described the best features.)
- then he asked me about the type of database used, I told him sqllite (that came as default with django project, then he asked me about similarity between sqllite and mysql).
- then he asked me to rate myself on scale of 1-10 in mysql.
- then he asked me to explain join in mysql. (explained all types)
- then he asked me a sql question based on my project feature (upvote and downvote). took some time here by clarifying the question (it was on join again).
- again he asked one more question based on aggregate functions.
- then he discussed my designing journey and related stuff from resume.
- then he asked me if I have any question , I asked one and he took at least 10 minutes to explain.

note: this round would depend upon union of your resume and interest of interviewer. In my case it revolved around my project and sql basics.

Round 3 :: HR (35 minutes)
- started with introduction
- she asked about my native state and cultural difference between here and there.
- she asked me about strength and weakness .
- she asked me about my hobbies , as I told designing and playing outdoor games . She asked me why you choose computer science instead of designs and all . then I explained.
- then she asked :tell me about the time when you faced any challenge while working with team and how did you managed that.
- then she asked me about the company and if I know anything about CEO like name. also asked me to research more.
- then she told me some principles of axtria and also asked me to tell which of these values or principles aligns with you mostly.
- then she asked me if I have any question.

tips:
- carefully listen to the interviewer.
- clarify before answering .
- be honest , otherwise they would move to next question if they catches you being smart. It may impact your chances of getting selected . (happened with me in Userfacet).
- do ask feedback + the question that they ask at the end: if you have any question?
- have a healthy and two-way conversation.
