CODING NINJAS INTERVIEW EXPERIENCE

Indra Kishore, MCA (2019-22)

Round 1: Online Assessment (1:30 hour)

- 2 coding Questions
- Platform: Coding Ninjas
- Languages: C++, Java, Python
- Question 1: [Print the arrow pattern](#)
- Question 2: [Winner of the circular game](#)

Lecture Evaluation

- We have to review the Dynamic Programming lectures and find out the answer of some questions.
- **Questions given in the google form were:**
  - What went well in this lecture? Give a detailed analysis.
  - What can be improvised in this lecture? Give a detailed analysis with relevant examples and suggestions.
  - If you were to design this lecture, what changes would you like to make?
  - What are your thoughts on the coding problems here? Are they appropriate or would you like to replace a few?

Round 2: CN 1st Interaction (45 min)

The Interviewer was friendly. First, he introduced himself and then he started with my interview.

- He asked me which subjects I have studied till this semester.
- Discussed about lecture evaluation which we submitted in google form.
- He asked me why you are interested in Content Associate and not other profile.
- Asked me what I think about online learning platforms, my experience on that.
- Asked me what are your opinion about online lectures over offline lectures.
- Asked me essential components of a good content and how to make them more effective?
- Asked me how to build students confidence in particular topic?
- Discussed about my projects and asked several questions about them.
- Discussed about my family background and current location.

Then in the end, interviewer asked me if I had any questions. I asked about profile and how was day to day life at coding ninja for new joiner.

Round 3: CN 2ND Interaction (1 hour)

Started with the introduction of her and asked me to introduce myself.

- In Depth discussion on lecture evaluation and asked many questions on that.
- She asked me rate myself on a scale 1 to 10 for my DSA skills.
- Asked me How to design recursion modules and which types of question include in that and why?
- She asked me to explain priority queue with real world examples and give and overview of how I'll design this module.
- Discussed about project architecture and what are the challenges faces during implementation.
- Asked me what you like group project or individual project and why?
- Asked me what are qualities of a good teacher.
- Asked me how to build confidence of educators which is good in knowledge wise but unable to deliver best(like explanation)?
- Discussed the approaches of online assessment's coding questions.
- Why Content Associate and not other profile?
- Asked me about my first-round interview experience.

Final result: 3 students were selected.

Suggestions:
- Just be confident and don't get disheartened if you are not selected by any other company because it actually depends a lot on your luck, But stay prepared, always!
- Revise everything that have been written on your resume.
- Be honest and real, try to give your unique ideas.
- Before going for an interview, never think that you are not fully prepared or others have done so much. Think that the question asked by the interviewer will be already known to you or you will be able to solve them.

All the best, and good luck.
