Interview Experience:(Intellicus Technologies)

Round 1:
Mcq mainly technical. OOP concept, DBMS, Java(mainly Inheritance, Abstract class etc.). You will be given some code in Java and you need to write the output.

Round 2(Technical Round):
You will be given to asked to write proper code, mainly on arrays, Strings, LinkedList, Trees, some using HashMap.
Some of the questions that I remember:
1. Diagonal Traversal of a Tree
2. Apply BFS and DFS on a tree
3. Remove every kth node of a Linked List
4. Check if a Linked List has cycle has not, and if so remove it.

Others were on Arrays , Strings and two questions were asked that you have to apply using Hashmap.
It will continue for nearly 1 hour or more.

Round 3(Managerial Round):
You will be asked about your projects. Any technologies You have worked upon. Short questions on such technologies. It will be a discussion round.

Round 4(HR round):
Simple HR questions will be asked that is how many companies have visited the campus before, why were you not selected and so on. You need to be confident enough and should not answer anything that goes against you. Here just they check your confidence that is how much confidence you have in yourself.

All the best guys.

Thanking You,
Pradipti Kayal.
