Arzoo Jangra (MSc 2021-23)
Faircent

Difficulty Level: Easy

Round 1: Resume Based Shortlisting

Round 2: Technical + HR (30-35 minutes)
- Introduce yourself
- Project discussion : Explain the projects mentioned in your resume briefly.
- Which one is your favorite subject ?
- What is a static class?
- **DBMS :** ER diagram and its properties
- Difference between Foreign key and Primary key
- Difference between DDL(Data Definition Language) and DML(Data manipulation Language)
- ACID properties of DBMS
- What subjects are you studying in your current semester and which one has your interest(I replied Deep learning looks interesting as it's related to my current project)
- Difference between Machine Learning and Deep learning
- Currently what are you doing in the Machine Learning field? For this I explained my Minor project which is on Recommender Systems.
- He also asked if I had worked in React and NodeJS. To this I replied no, I haven't worked yet but would like to learn.
- Later he asked me if I had any questions and told me about the company.

Result : Selected

Tips:
- Be confident about what you have mentioned in your resume. Revise your projects thoroughly so that you can explain them whenever asked.
- They just ask about the technologies you have mentioned in your resume to know you better.
- Preparing basic DBMS, CS Fundamentals and DSA is enough.

All the best!
