INTERVIEW EXPERIENCE – Quantiphi

Shivani - MCA

Total Rounds: 3

ROUND 1: *(ONLINE APTITUDE + CODING TEST)*

There were a total of 78 mcq (Verbal Ability, Quantitative Aptitude, Logical Reasoning, Data Interpretation, java, html, css and CS fundamentals) + 2 coding problems.

Round 2: *Technical Interview (35-40 mins.)*

The interview started with my brief introduction. Then he asked me to explain one of my projects. He asked some questions related to project. Then he asked me to explain Quick sort and Merge Sort. Then he asked me which sorting algo between them is better and why. Their best case and worst case. Then he asked me to write the pseudo code of merge sort.
After that he asked me about the OOPs principles. He asked me the difference between method overloading and method overriding (implementation also).

He asked me about ACID property, normalization and its types in dbms. He asked my some basic sql queries and difference between WHERE and HAVING clause. Then he asked me to write a program to return all the duplicate characters in a string.

In the end he asked me if I have any questions, I asked one and concluded the interview.

Round 3: *HR Round (30 mins.)*

The interviewer started with his brief introduction and asked me to introduce myself. He asked me to explain one of my project. Then he asked me several situation based questions and my strengths and weakness. Then, he asked if I had any questions, then we both had a little cross question session.

Result 8 students were selected.
