Quantiphi Interview Experience For MLE

Round 1: MCQ + Coding (90 min)

78 MCQs based on aptitude, language, DBMS, etc

2 coding questions.

Round 2: Technical Interview 1

Based on how you perform in the OA. They select you for either MLE or FE (machine learning engineer or framework engineer).

I got selected for MLE (Machine Leaning Engineer).

At first, they asked for a brief introduction then about the projects. They also asked whether I have done any projects in Machine learning.

Few questions related to C++/C (OOPs and Constructor etc).

And Few from Python too.

From DSA, they asked to solve the 2 Sum problem in O(n) time.

Round 3: Technical Interview 2

In round 3 they only ask questions related to ML and the introduction.

-Real-life use case of ML

-Type of ML.

-Algorithms I know.

-Why MLE?

-Why Quantiphi

Conclusion: Internship + FTE.
